DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 71,82 and 83 are rejected under 35 U.S.C. 102(b) as being anticipated by Sawicki et al 5648874.

These claims stand rejected as discussed in the previous office action, with Sawicki disclosing "an alignment mark" (e.g. note fig. 15A-F or 16A-F, etc.).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2872

4. Claims 73-75, 77-81 and 84-88 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sawicki.

The limitations of these claims are either met by or obvious over Sawicki for the reasons given both above and in the previous office action.

Response to Arguments

5. Applicant's arguments filed 7/28/03 have been fully considered but they are not persuasive.

Applicant has argued that Sawicki does not show an alignment mark as recited in the claims.

However, as noted above, Sawicki does in fact show a reference or alignment mark in, for example, figs. 15 or 16 (note the portions on the left side of the layer which have been removed to form a mark). Figure 13(C) is also noted as showing an alignment mark. Accordingly, the feature in question upon which applicant's arguments are based is seen to be met by the reference.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harden et al show a diffraction element including an alignment mark(18).

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
